

TITLE OF THESIS SUBMITTED BY THE POSTGRADUATE STUDENTS

OBSTT. & GYNAE

S. No.	Plan of Thesis (Year 2006)
1.	Role of endocervical brush in improving the quality of specimen obtained from endocervical curettage.
2.	Intravenous labetalol in the treatment of severe hypertension in pregnancy
3.	The relevance of universal screening for gestational diabetes mellitus
4.	To study the role of saline contrast hysterosonography in evaluation of permimenopausal abnormal uterine bleeding.
5.	Evaluation of non –invasive tests of fetal well-being as predictors of intra-uterine infections in pre-term pre-mature rupture of membranes.
6.	Role of office Hysteroscopy in Abnormal Uterine Bleeding.
7.	Study of cardiotocography and fetal scalp stimulation test in intrapartum fetal distress
8.	Correlation of biochemical markers of bone turnover and bone mineral density in females of reproductive age group.
9.	A comparative study of medical management with methotrexate and laparoscopic conservative surgery for the treatment of unruptured tubal ectopic pregnancy.
10.	Role of low dose aspirin on uterine receptivity in patients of anovulatory and unexplained infertility undergoing intrauterine insemination.
11.	To study of effect of gestational thrombocytopenia on fetomaternal outcome in pregnant women.
12.	To evaluate the effectiveness of vaginal misoprostol in cervical priming prior to hysteroscopy in peri and postmenopausal women
13.	Bacterial vaginosis in spontaneous preterm labour and its correlation with fetomaternal outcome.
14.	Role of L-arginine on nitric oxide levels in intrauterine growth restriction and its correlation with neonatal outcome.
15.	Evaluation for endometrial and perifollicular vascularity by transvaginal power doppler as potential prognostic indicators affecting success of intrauterine insemination
16.	Study of feto-maternal polymorphisms in genes of rennin-angiotensin system (RAS) and angiogenesis pathways in pre-eclampsia and eclampsia
17.	Comprehensive evaluation of women recurrent pregnancy loss: A search for multifactorial etiology

18.	A prospective randomized controlled trail to individualize the duration of postpartum magnesium sulfate therapy in severe preeclampsia using clinical parameters
19.	Evaluation of Role of perineal support during childbirth in prevention of perineal trauma
20.	To evaluate the effects of N-Acetylcysteine in polycystic ovarian syndrome
21.	A prospective randomized study to compare maternal and neonatal outcomes with the 'Restrictive' Vs 'Liberal use policy of episiotomy in nulliparous women
22.	Determinants of reproductive tract infections and sexually transmitted infection amongst the patients attending a gynaecological out patient department at a tertiary referral centre
23.	Evaluation of current status of Hysteroscopy in Common Gynaecological Disorders
24.	Study of fetomaternal outcome in breech delivery
25.	Role of oral misoprostol, rectal misoprostol and intramuscular 15 methyl PGF _{2α} for prophylaxis of post partum haemorrhage
