

TITLE OF THESIS SUBMITTED BY THE POSTGRADUATE STUDENTS

GENERAL SURGERY

S. No.	Plan of Thesis (Year 2006)
1.	To compare subfascial endoscopic perforator vein surgery (SEPS) with traditional perforator surgery (Robb's) and to assess feasibility of SEPS under tumescence local anaesthesia in patients unfit for general or regional anaesthesia.
2.	Evaluation of Inline method of vas occlusion- A modi-fiction of No Scalpel Vasectomy
3.	To assess the occurrence of deep vein thrombosis after major abdominal surgery
4.	A comparative study of primary closure of the common bile duct with and without biliary stent after laparoscopic common bile duct exploration.
5.	To assess hypocalcemia after thyroid surgery
6.	To evaluate the result of laparoscopic fundoplication for gastro esophageal reflux disease
7.	Evaluation of stapled hemorrhoidectomy as a day care surgery
8.	Evaluation of recent diagnostic methods in diagnosis of abdominal tuberculosis and clinical and operative correlation
9.	A prospective study to evaluate the patency of internal jugular vein after neck dissections in patients with head and neck cancer
10.	Diagnosis and management of subacute intestinal obstruction: A prospective study
11.	A study of factors influencing outcome of surgery for benign prostatic hyperplasia
12.	Proportion, causes and patient characteristics of injury and road-traffic injury patients along with study of injury pattern, outcome and human factors in road-traffic injury patients admitted under surgery at GTBH-UCMS
13.	A study on intraoperative assessment of tumor size and its comparison with others methods in patients of breast cancer
14.	Percutaneous nephrolithotomy (PCNL) – An outcome analysis
15.	Study of factors which predict the risk of intra-abdominal sepsis and burst abdominal in patients with abdominal trauma undergoing lapartomy
16.	A prospective outcome analysis of laparoscopic versus open appendectomy
17.	Clinical presentation of abdominal tuberculosis in HIV seronegative adults- A prospective study to investigate the relation of symptomatic presentation with clinical diagnosis and prognosis

18.	A study of effect of placement of 0.5% bupivacaine soaked surgical in gall bladder bed on pain relief following laparoscopic cholecystectomy
19.	A study of correlation of histopathology with the outcome following stapled haemorrhoidectomy
20.	Anal pressures after stapled haemorrhoidectomy
21.	Prospective study of incidence of surgical intervention in closed head injuries in patients above 15 years
22.	A study of feasibility and safety of laparoscopic cholecystectomy in obese patients
23.	Diagnostic value of noncontrast computerized tomography (NCCT) in evaluation of acute flank pain suspected of ureteric colic
24.	Role of photodynamic therapy in oral cancer
25.	To study the role and efficacy of tamsulosin treatment in expulsion of steinstrasse after ESWL
26.	Comparison of systemic stress response in laproscopic surgery v/s open surgery in children
27.	Incidence of carcinoma in thyroid swellings and its management will be compared with presently available data
