

TITLE OF THESIS SUBMITTED BY THE POSTGRADUATE STUDENTS

ORTHOPAEDICS

S. No.	Plan of Thesis (Year 2008)
1.	Internal fixation of fracture distal end radius with volar locking plate
2.	Association of facet tropism with lumbar disc herniation
3.	A comparative study of complete subtalar release and Joshi's external stabilization system in the management of neglected and resistant idiopathic congenital talipes Equinovarus deformity
4.	Arthroscopic assisted reduction and fixation of tibial plateau fractures
5.	Randomized control trial assessing clinical and radiological outcome after stabilization of fresh femoral shaft fracture in children of 6-12 years with titanium elastic nail system versus rush nail
6.	Randomized controlled trial to compare the efficacy of autograft and partially decalcified allogenic bone graft in treatment of delayed and non unions of diaphyseal fractures of long bones
7.	Randomized controlled trial comparing proximal femoral nail Vs dynamic hip screw in the treatment of intertrochanteric fractures of femur
8.	Role of arthroscopy of wrist in the management of dorsal wrist ganglion
9.	Comparison of surgical outcomes of modified bosworth screw fixation (Plain) and supplemented with coracoacromial ligament transfer in acute complete acromioclavicular dislocations.
10.	Anatomic risks of shoulder arthroscopy portals in modified lateral decubitus position: anatomic cadaveric study of commonly practised portals
11.	Evaluation of the role of debridement in the management of grade I open fractures of tibia.

ORTHOPAEDICS

S. No.	Plan of Thesis (Year 2007)
1.	Evaluation of Trochantric Flip Osteotomy as an Approach in the Treatment of Acetabular Fractures
2.	Evaluation of Extended Fenestration Surgery in Degenerative Lumbar Canal Stenosis
3.	Role of HIP Arthroscopy in the Diagnosis of Painful HIP Pathologies and Comparison with Magnetic Resonance Imaging
4.	Comparative study of Single and Double Bundle Techniques of Anterior Cruciate Ligament Reconstruction using Hamstring Tendon Grafts

5.	Posterior Stabilization using Newer Screw and Rod System in Traumatic and Non Traumatic Cervical Spine Disorders
6.	Assessment of Efficacy of Minimally Invasive Surgery using Tubular Retractors in Patients of Lumbar Disc Prolapse
7.	Randomised Controlled Trial to Compare the Quality of Femoral Canal Cementation, using Two Femoral Cementing Techniques
8.	Single Stage Extrapleural Anterior Decompression and Fusion with Posterior Instrumentation in Unstable Burst Fracture of Thoracolumbar Spine T11-L2
9.	Prospective Randomized Comparison of Pretensioning by Cyclic Loading and on Tension Board with Tensioner for a Arthroscopic Anterior Cruciate Ligament Reconstruction using Hamstring Autograft
10.	Evaluation of the result of tension band wiring in fracture patella by minimally invasive technique
11.	The role of Arthroscopic Synovial Biopsy & Amplified Mycobacterium Tuberculosis direct test in the diagnosis of clinically suspected cases of tubercular arthritis
12.	Prospective objective analysis of predictors of neurological recovery in subaxial cervical spine injury
13.	Critical Analysis of Role of Arthroscopic Double Bundle Anterior Cruciate Ligament Reconstruction in Anterior Cruciate Ligament Deficient Knees a Clinical Study
