

TITLE OF THESIS SUBMITTED BY THE POSTGRADUATE STUDENTS

OPHTHALMOLOGY

S. No.	Plan of Thesis (Year 2009)
1.	Comparative evaluation of indocyanin green mediated photothrombosis with intravitreal triamcinolone acetonide versus intravitreal bevacizumab in wet age related macular degeneration
2.	Comparative evaluation of efficacy and safety of silicon rod sling with autogenous fascia lata in the management of blepharoptosis
3.	Assessment of endothelial cell loss and visual outcome in manual small incision cataract surgery using modified blumenthal's and microvectis technique
4.	Analysis of retinal nerve fiber layer (RNFL) thickness and optic disc morphology using spectral domain optical coherence tomography (SD-OCT) in paediatric eyes
5.	Dissociated horizontal deviations: spectrum of presentation, cognate motility disorders and alterations in proprioceptive structures
6.	Overnight orthokeratology study to evaluate efficacy and stability in myopia regression
7.	A comparative study of refractive and topographic changes between early and advanced keratoconic eyes undergoing corneal collagen crosslinking
8.	Sonographic assessment of optic disc cupping in glaucoma
9.	To compare the effects of timolol maleate 0.5% with sustained release timolol maleate in patients with primary open angle glaucoma
10.	To study the macular thickness changes after uncomplicated phacoemulsification using optical coherence tomography
11.	Comparative evaluation of efficacy of topical non-steroidal anti-inflammatory drugs in cataract surgery
12.	A clinical study to evaluate outcome of corneal collagen cross linking (C3 R) technique in cases of keratoconus by corneal topography using orbscan
13.	A clinical study of retinal nerve fibre layer (RNFL) thickness by optical coherence tomography (OCT) and optic nerve head analysis by heidelberg retinal tomograph (HRT) in patients with acute onset rise of intraocular pressure
