

TITLE OF THESIS SUBMITTED BY THE POSTGRADUATE STUDENTS

GENERAL MEDICINE

S. No.	Plan of Thesis (Year 2009)
1.	A clinico biochemical study of community and hospital acquired sepsis
2.	Study of periodontal disease and metabolic syndrome as risk factors in young patients with coronary artery disease and correlation of these risk factors with angiography
3.	Seroconversion and seroprotection after hepatitis B vaccination using recombinant vaccine via subcutaneous route in patients with bleeding diathesis
4.	Study of allergic bronchopulmonary aspergillosis in bronchial asthma and analysis of early stage allergeno-proteome of aspergillus fumigatus
5.	Epidemiology of refractory hypertension- A hospital based study
6.	Clinico-immunological profile and factors contributing to failure of first line anti-retroviral therapy in people living with HIV aids (PLHA)
7.	Immune reconstitution inflammatory syndrome (IRIS) following initiation of anti-retroviral therapy (ART)
8.	Polymorphisms of renalase gene in patients of chronic kidney disease
9.	To study the vitamin-D status in HIV positive patients
10.	The virological response to first line anti-retroviral treatment in people living with HIV aids (PLHA)
11.	Evaluation of aspergillus hypersensitivity in patients with chronic obstructive pulmonary disease
12.	Study of activated protein C resistance and lupus anticoagulant in young patients of cerebral venous thrombosis

13.	Polymorphism and expression of HSP70 protein in acute viral hepatitis and fulminant hepatic failure and their clinical relevance
14.	The study of mineral metabolism in type 2 diabetes mellitus
15.	Clinical and sociodemographical profile of patients presenting in emergency ward with acute poisoning
16.	Correlation between diabetic nephropathy and diabetic retinopathy in type- 2 diabetes mellitus
17.	A study of clinical profile of patients with organ non-specific (systemic) autoimmune diseases with special reference to cardiopulmonary involvement
18.	The role of pro-inflammatory cytokines in patients of acute ischemic stroke.
19.	To establish an association of thyroid hormone derangement and other enzyme biomarkers in metabolic syndrome
20.	Evaluation of Lipoprotein(a) and other lipid parameters in microvascular complications of type 2 diabetes mellitus.
21.	A study of clinical profile of patients with Deep vein thrombosis
22.	Evaluation of asymmetric dimethylarginine and advanced oxidation protein products as risk factors for carotid atherosclerosis in patients with chronic kidney disease
23.	Profile of coronary artery disease in women with particular reference to risk factors, extent of atherosclerosis and comorbidities
24.	Effect of telmisartan and perindopril on endothelial function, metabolic parameters and serum adiponectin levels in stage I hypertensive patients- a randomized placebo controlled double blind study
25.	Correlation of serum homocysteine levels with carotid atherosclerosis in patients with chronic kidney disease and the effect of hemodialysis on its levels
26.	To study the association of coronary artery disease and non alcoholic fatty liver disease

27.	Evaluation of periodontal disease as a risk factor for atherosclerosis in patients with chronic kidney disease
28.	Prevalence of autoimmune thyroid disease in delhi and its correlation with iodine status
29.	Study of serum uric acid in metabolic syndrome and its components
30.	Liver involvement in Human immunodeficiency virus infection
31.	to study the early predictors of success of noninvasive positive pressure ventilation respiratory failure
32.	To study the clinical profile and haematological parametres in dengue syndromes
33.	To study correlation of serum creatinine based calculation of glomerular filtration rate with measured ratio isotope glomerular filtration rate in healthy individuals, chronic kidney disease patients and renal transplant recipients
34.	Role of FDG pet in assesment of myocardial viability
