

TITLE OF THESIS SUBMITTED BY THE POSTGRADUATE STUDENTS

GENERAL SURGERY

S. No.	Plan of Thesis (Year 2009)
1.	Comparative study between intraoperative cholangiography and choledochoscopy to determine ductal clearance in patients undergoing laparoscopic choledocholithotomy
2.	Evaluation of laparoscopic bariatric procedures in obese patients with co-morbid conditions
3.	Role of high resolution multidetector computedtomography in characterization and management of renal space occupying lesions
4.	Feasibility and safety of three port procedure for laparoscopic cholecystectomy
5.	Prospective randomized comparison of retroperitoneoscopic and open ureterolithotomy of upper-and mid -ureteric calculi
6.	A correlation of multislice computed tomography perfusion study with fine needle aspiration cytology in nodular thyroid disorders
7.	Prospective randomized study comparing holmium laser and cold knife in optical internal urethrotomy for management of urethral stricture
8.	To study serum levels of IL-6 as a predictor of response to anthracycline based chemotherapy in locally advanced breast cancer
9.	Study to evaluate the role of severity stratification of skin and soft tissue infections (SSTIs) in formulating treatment strategies and predicting poor prognostic factors
10.	Stapled haemorrhoidopexy with height of purse string suture above dentate line as outcome indicator
11.	Study of nature of axillary drainage fluid after axillary lymph node dissection in breast cancer
12.	A study of Urodynamic profile in patients with Inguinal hernia without lower urinary tract symptoms.

13.	A comparative study of clinical diagnosis and duplex ultrasonography in evaluation of surgical outcomes in patients of varicose veins
14.	To study the outcome following laparoscopic ventral hernia repair using dual mesh
15.	A prospective study on the role of centchroman in regression of fibroadenoma
16.	Role of 24 hour ambulatory esophageal pH monitoring in Gastroesophageal Reflux Disease
17.	Abdominal Tuberculosis: Clinico-Pathological profile, current management practices, and outcome in patients undergoing laparotomy at GTB hospital, Delhi
18.	Effect of pentoxifylline on abdominal wound infection and dehiscence following laparotomy for perforation peritonitis: A randomised controlled trial
19.	Effect of treatment with low dose hydrocortisone in patients of severe sepsis- a prospective randomised trial
20.	Role of 'Fast' and 'DPL' in torso trauma as adjuncts to primary survey: A prospective randomized clinical trial
21.	Randomized controlled trial of nifedipine as oral therapy Vs. topical application in treatment of anal fissure
22.	Randomized controlled trial of antibiotic therapy versus appendicectomy in primary treatment of acute appendicitis
23.	A controlled study of clinical, genetic and environmental risk factors in patients with fibroadenoma and carcinoma breast
24.	A study on evaluation of clinically negative axilla in cases of carcinoma breast by pre-operative ultrasound
25.	Critical Analysis of hydronephrosis in children
26.	Incidence of diabetes mellitus in patient of peripheral arterial disease and management outcomes in diabetic patients
27.	A study of outcome after breast conservative surgery in locally advanced breast cancer

28.	Approach to wound bed preparation in superficial soft tissue infections: a comparative study of methods of debridement
29.	Correlation of preoperative clinical laboratory, sonological and peroperative findings in gallstone disease
