

MS - OTHORHINO (E.N.T.)

Title (Plan of Thesis) 2010-2013

Study of efficacy of biological haemostatic agents in tonsillectomy

Study of osteomeatal unit in chronic rhinosinusitis correlating findings of multidetector CT images and operative findings in functional endoscopic sinus surgery

Clinico-radiological study of post-operative anatomical changes in cochlear implantee

To study the effect of aesthetic nasal surgery on nasal airflow and resistance

Personal music devices : An assessment of user profile and potential hazards

To study the use of diode laser in the treatment of vocal cord lesions with pre and post operative videostroboscopic evaluation

To study the effect of preincisional infiltration of ropivacaine for post tonsillectomy pain relief in pediatric patients

To study the pH in external auditory canal and the microbiological profile in cases of acute otitis externa

Comparison of vaseline ciprofloxacin and triamcinolone acetonide impregnated nasal dressing following nasal and sinus surgeries vs vaseline and ciprofloxacin nasal dressing

Clinical profile, skin sensitivity and assessment of airway obstruction in allergic rhinitis

Quality of life and voice outcome after treatment of early laryngeal cancer by transoral CO₂ laser microsurgery

Role of image - Guided navigation system in endoscopic dacryocystorhinostomy in patients of chronic dacryocystitis

The impact of biofilms on quality of life of rhinosinusitis patients after endoscopic sinus surgery

Comparative analysis of quality of voice in patients undergoing thyroplasty type 1 using titanium vocal fold medialization implant (TVFMI™) vs silastic implant

Videonystagmography : Clinical application in vertiginous patients
