

MS - GENERAL SURGERY

Title

(Plan of Thesis) 2010-2013

Assessment of outcome of percutaneous drainage of amoebic liver abscess with complications

Serum levels of PAI-1 and TNF α as a predictor of response to anthracycline based chemotherapy in locally advanced breast carcinoma

Prospective comparison of laparoscopic adjustable gastric banding and sleeve gastrectomy for obese patients with comorbid conditions

Clinico radiological assessment for prediction of difficult laparoscopic cholecystectomy in gallstone disease

Prediction of early post thyroidectomy hypocalcemia by iPTH and ionized calcium measurement

Evaluation of status of cervical lymphnodes by multislice cect and doppler ultrasonography in patients with thyroid cancer

To evaluate the role of tamsulosin hydrochloride in medical expulsive therapy of single ureteral stone

Comparison of ^{18}F -FDG PET-CT and ^{11}C -MET PET-CT for assessment of response to neoadjuvant chemotherapy in locally advanced breast carcinoma

Comparison of alvarado with ripasa score in diagnosis of acute appendicitis and correlation of both the scoring systems with intraoperative and histopathological findings

To evaluate laparoscopic intraperitoneal onlay mesh repair in inguinal hernia using a dual mesh

Evaluation of clinical outcome of early laparoscopic cholecystectomy in acute calculus cholecystitis

Comparison of clinical, radiological and pathological response to neoadjuvant doxorubicin and paclitaxel versus cyclophosphamide, doxorubicin and 5-fluorouracil (CAF) in locally advanced breast cancer

Comparison between apache-II scoring, CRP, IL-6 estimation and contrast enhanced computed tomography findings for the early prediction of severity and morbidity in acute pancreatitis

Evaluation of α and β oestrogen receptors in testis and epididymis of fertile and infertile males

Prognostic implications of double-J ureteral stenting in patients with renal stones undergoing extra corporeal shockwave lithotripsy (ESWL) - a prospective randomised control study

Study of a scoring method to predict difficult laparoscopic cholecystectomy

A study of changes in urinary symptoms and urodynamics after transurethral resection of prostate in patients of benign prostatic hyperplasia

The outcome of laparoscopic cholecystectomy in diabetic patients : A prospective study

A randomized control trial to evaluate the efficacy of transabdominal preperitoneal (TAPP) versus totally extra peritoneal (TEP) repair in management of bilateral inguinal hernia

A study of histopathological changes of the cystic duct following division with harmonic scalpel

The effect of laparoscopic cholecystectomy on oesophageal alkaline reflux

Short term outcomes and patient satisfaction after unilateral inguinal mesh hernioplasty as an outpatient procedure

A randomized controlled trial to compare optical trocar system (VISIPORT) versus open (HASSON) technique for gaining initial access into preperitoneal space in total extraperitoneal repair of inguinal hernia

Urodynamic changes in patients after unilateral open inguinal hernia repair

A randomised controlled trial of excision versus invagination in management of indirect inguinal hernial sac

A randomized clinical trial to compare the efficacy and safety of naftopidil versus tamsulosin in the medical management of symptomatic benign prostatic hypertrophy

Anal fistula with special reference to ano-rectal manometry and microbiological profile : A prospective observational and analytical study

Epidemiology of injury and pattern of injury related deaths at a tertiary care hospital

Socio demographic, clinical and microbiological profile, and risk factors for major amputation in patients with diabetic foot

A study of toxicogenomic risk factors in cases of carcinoma urinary bladder : A case control study

A controlled study of toxicogenomic factors and estrogen receptor β expression in carcinoma prostate and their correlation to stage, grade and response to therapy

Liver abscess : Clinical profile and role of USG guided aspiration in management. A prospective study

A randomized study comparing low pressure and standard pressure pneumoperitoneum during laparoscopic cholecystectomy

Prospective randomized study to compare laparoscopic total extraperitoneal inguinal hernioplasty under general anaesthesia versus open lichtenstein inguinal hernioplasty under local anaesthesia

Effect of rigid cystoscopy on serum prostate specific antigen levels

Randomized controlled trial to study the wound performance following subcutaneous infiltration and topical instillation of ceftriaxone before primary closure of skin in laparotomy for peritonitis due to non-traumatic perforation of small intestine

Damage control surgery Vs. definitive surgery: A randomized controlled trial in patients with or at risk of exsanguination following truncal trauma

A prospective study on post-mastectomy chronic pain and its impact on quality of life

Development of scoring system to improve diagnostic yield of upper gastrointestinal endoscopy

A prospective study of outcome in patients with intra-abdominal hypertension admitted in ICU

Clinicopathological features of carcinoma esophagus and its management

Critical analysis of trends in presentation of hypospadias in Indian population and study of outcome results

To study incidence and risk factors for venous thromboembolism in surgical intensive care unit patients undergoing major surgeries in Army Hospital Research and Referral (R&R) and Base Hospital Delhi Cantt - 10

Outcome prediction in patients of head injury based on midline shift on CT scan
