

MS - OBSTETRICS & GYNAECOLOGY

Title
(Plan of Thesis) 2010-2013

Comparative evaluation of effect of normal saline and lignocaine perturbation during intrauterine insemination cycle in unexplained infertility

Comparative evaluation of intravenous iron sucrose and oral iron therapy in preoperative anemia in elective surgery for benign gynaecological disorders

A clinico-laboratory study of pregnancy with severe anemia

Study of serum testosterone, dehydroepiandrosterone sulfate and cortisol in women with premature ovarian failure in comparison with normal menstruating and postmenopausal controls

Maternal and fetal outcomes in pregnant women with vitamin D deficiency

To assess the accuracy of colposcopic impression for the diagnosis of premalignant and malignant lesions of the cervix, using histopathology as the gold standard

A study to ascertain utility of low dose magnesium sulphate in management of eclampsia

Role of laparoscopy in diagnosis of genital tuberculosis

Effect of estradiol valerate and gonadotropins on endometrium in clomiphene citrate stimulated intrauterine insemination (IUI) cycle

Evaluation of intracervical prostaglandin E2 gel followed by vaginal misoprostol for medical termination of pregnancy between 13 to 20 weeks of gestation

Predictive value of second trimester uterine artery doppler in pregnant women with low first trimester serum pregnancy associated placental protein-A (PAPP-A)

Screen and treat approach for suspected preinvasive lesions of cervix by cryotherapy

To study the effect of progestogens on IL-6, TNF- α and IL-10 in threatened abortion

To study the clinical outcomes of post placental insertion of copper T 380A intrauterine device

Maternal hemodynamic changes in gestational hypertension and its correlation with fetomaternal outcome

A comparative study of endometrium with hysteroscopy, transvaginal sonography and color doppler in women with abnormal uterine bleeding

Role of PAPP-A and doppler velocimetry in assessment of fetomaternal outcome in high risk pregnancy

The effect of yogic breathing exercises on fetoplacental circulation and perinatal outcome in intra uterine growth restriction

A study of controlled ovarian stimulation with clomiphene citrate or letrozole in combination with gonadotropin and intrauterine insemination in unexplained infertility

To study the clinical, biochemical and genetic profile of women with severe pre-eclampsia

To assess the effect of maternal BMI on fetomaternal outcome

The study of maternal and fetal outcome after elective repeat caesarean versus vaginal birth in women after one prior LSCS

Role of diagnostic laparoscopy in chronic pelvic pain

The study of postpartum, post MTP and interval copper-T 380 A insertion

Role of thyroid dysfunction and thyroid autoimmunity in infertile women

Oral micronized progesterone for maintenance tocolysis after arrested preterm labour - A randomized double blind placebo controlled trial

Predictors of maternal outcome in obstetric patients admitted to intensive care unit : A consecutive follow up study

Evaluation of idiopathic chronic pelvic pain : Quest for a tubercular etiology

Serum elastin and 25 hydroxyvitamin D levels in women with pelvic organ prolapse

Evaluation of endothelial function in obese and non-obese women with polycystic ovarian syndrome

Umbilical cord arterial blood analysis in neonates born with nuchal cord
