

**MS - OTHORHINO (E.N.T.)**

**Title**

**(Plan of Thesis) 2011-2014**

To study the effect of laryngectomy on olfaction and the impact of olfactory rehabilitation post laryngectomy

Type-I tympanoplasty by cartilage palisade and temporalis fascia technique - A comparison

To compare the efficacy of tympanoplasty with and without cortical mastoidectomy in tubotympanic chronic otitis media

Use of otoendoscope for visualising hidden areas during mastoidectomy

Comparison of conventional instruments and mechanical microdebridgers in endoscopic sinus surgery for chronic sinusitis

Effect of long term administration of oral Azithromycin versus sinonasal surgery in patients suffering from chronic sinus and nasal diseases; A prospective comparative study

Role of mometasone furoate aqueous nasal spray for management of adenoid hypertrophy in children

A comparative study of success rate of tympanoplasty type I in children (5 to 8 years) and adults

To study the pH at middle meatus in normal subjects and patients of chronic rhinosinusitis

Effect of type I tympanoplasty on the quality of life of csom patients

Findings of lacrimal endoscopy in patients of chronic dacryocystitis undergoing endoscopic dacryocystorhinostomy

Oncological and functional outcomes following transoral CO<sub>2</sub> laser microsurgery in early glottic cancer

The role of sialendoscopy as a primary diagnostic modality in salivary gland diseases

A prospective study of various factors affecting the auditory perception outcomes in cochlear implant recipients

Superior laryngeal nerve injury and its impact on voice outcome of patients undergoing thyroid surgery

Contact endoscopy as a diagnostic and evaluative tool in cases of suspicious mucosal lesions of upper aerodigestive tract
