

MS - OPHTHALOMOLOGY

Title

(Plan of Thesis) 2011-2014

Accuracy of potential acuity meter for predicting visual acuity following cataract surgery

Optic nerve diameter in glaucoma - an echographic study

Serum lipid profile in meibomian gland dysfunction

Randomised controlled trial to evaluate the role of 25% dextrose dipped pacifier and topical proparacaine (0.5%) versus topical proparacaine (0.5%) for pain relief during screening for retinopathy of prematurity

Comparative study of visual outcome between wavefront-guided lasik and aspheric lasik for myopia and compound myopic astigmatism

Comparison of visual outcome after wavefront guided laser in situ keratomileusis and wavefront guided photorefractive keratectomy

Clinical comparison of the optical performance of aspheric and spherical intraocular lenses in pediatric eyes after cataract surgery

Evaluation of amniotic membrane as an adjunct to standard mitomycin C modulated trabeculectomy in glaucoma

To evaluate the efficacy of 6 hours occlusion and television exercises in treatment of mild, moderate and severe amblyopia

Surgical outcomes following bilateral modified harada ITO procedure, inferior oblique weakening and inferior transposition of medial recti, in V pattern esotropia

Low vision aids in children : profiling and effectivity

Comparative evaluation of severity of diabetic macular edema in patients with and without metabolic syndrome

Comparative study of horizontal muscle recession versus tenotomy and reattachment procedures for the management of infantile nystagmus syndrome

Evaluation of transcanalicular laserassisted dacryocystorhinostomy and the role of silicon tube intubation in primary nasolacrimal duct obstruction

A comparative study of endoscopic assisted transcanalicular laser dacryocystorhinostomy versus external dacryocystorhinostomy in pediatric age group

Comparative clinical evaluation of sutured scleral fixation of pc-iols versus sutureless scleral fixation of pc-iols with and without fibring glue

Dry eye following phacoemulsification surgery and its relation to intra-operative risk factors - A prospective study

Awareness, attitude and treatment seeking behaviour among established glaucoma cases : A questionnaire based study

Congenital color vision deficiency in undergraduate and postgraduate medical students : effect on assessment of colored clinical and laboratory signs

To evaluate changes in anterior segment anatomy on ultra bio microscopy after intravitreal anti vgef injection

Evaluation of changes in physiological parameters of normotensive patients undergoing cataract surgery by phacoemulsification technique under peribulbar Vs topical anaesthesia

To evaluate the microbiological quality of corneal grafts from donors, who have died from septic multi-organ failure and compare with donors without septicemia
