

MD - PATHOLOGY

Title
(Plan of Thesis) 2011-2014

Myoepithelial marker p63 in the cytological diagnosis of breast lesions

Hematologic response to imatinib in patients with chronic phase CML

Clinical audit of existing practices of repeat fine needle aspiration cytology in a general cytopathology service

Detection of *helicobacter pylori* in nasal polyps

Detection of her-2 amplification by chromogenic in-situ hybridization & immunohistochemistry in tissue microarray sections of breast cancer

Hemostatic abnormalities in children (1-10 years) with acute infection : A pilot study

To evaluate the association of the HFE gene mutations in β -thalassemia major patients with iron overload - A pilot study

Mitochondrial DNA injury in patients of chronic kidney disease with or without coronary artery disease

ESR 1 gene expression status in estrogen receptor alpha positive breast carcinoma - Correlation with other prognostic factors

Epidermal growth factor receptor expression in carcinoma of uterine cervix

Concordance amongst screeners in the use of the bethesda system for reporting thyroid cytopathology in an academic institution

Expression of matrix metalloproteinases (MMP)-2 and -9 in pediatric renal tumors

Ki67 immunostaining and its correlation with microvessel density in patients with multiple myeloma

Distribution of collagen type I and III and matrix metalloproteinase - 1 expression in cases with clinico-pathological diagnosis of intestinal tuberculosis

A study of cytomorphological spectrum of intracranial space occupying lesions and its histopathological correlation

To study the expression of cd10, er, pr, her-2/neu and its clinicopathological correlation in surface epithelial ovarian tumors

Correlation of flow cytometric analysis with morphology and cytochemistry in the diagnosis of acute lymphoblastic leukemia

Expression of CD 10, E-cadherin and β -catenin complex and its clinicopathological correlation in breast carcinoma

Correlation of flow cytometric analysis with morphology and cytochemistry in the diagnosis of acute myeloid leukemia

Histological characterisation of columnar cell lesions in patients with invasive breast carcinoma

A comparative study between conventional method and the bethesda system for reporting thyroid cytopathology and their histopathological correlation

Characterisation of direct immunofluorescence in autoimmune skin diseases

Study of serum adiponectin, interleukin-1 beta and HbA1c levels in women with gestational diabetes

A study of anti Beta-2 glycoprotein I and anti-prothrombin antibodies in patients with unexplained recurrent pregnancy losses

Nuclear morphometry in benign and malignant breast lesions and its correlation with cytomorphologic grading

Evaluation of her-2/neu oncoprotein in serum and tissue samples of women with breast cancer

Study of serum hepcidin & soluble transferrin receptor in children with anemia of chronic disease and iron deficiency anemia

Study of serum soluble E-selectin levels and its correlation with serum levels of IL-1 β AND TNF- α in patients with psoriasis

The flowcytometric immunophenotypic patterns in bone marrow aspirates/peripheral blood in chronic lymphoproliferative disorders and correlate with the morphology and immunohistochemistry in bone marrow biopsies

Determination of HLA specific allo-sensitization status in renal allograft recipients pre and post transplantation

A study of loss of heterozygosity in glioblastomas by molecular methods
