Title

(Plan of Thesis) 2011-2014

A randomized controlled trial to assess and compare the efficacy and safety of once daily versus alternate day atorvastatin therapy in naïve dyslipidemic patients

To study the effect of sitagliptin, liraglutide and lacosamide in experimentally induced pain, anxiety, depression, learning and memory in rats

Open label randomized controlled study to assess and compare the quality of life and safety of drugs to the patients receiving either enalapril or losartan in the treatment of uncomplicated stage 1 hypertension

Clinical pattern of carbamazepine and phenytoin induced cutaneous reactions and its association with HLA-B*1502 allele

Study of drug utilization and adverse drug reactions in outpatients of psychiatry department in a tertiary care hospital

Blood levels of rifampicin in children suffering from tuberculosis at doses administered under the revised national tuberculosis control programme

Experimental studies on the anti-inflammatory and immunomodulatory effects of phosphodiesterase-5 inhibitors, to evaluate their therapeutic potential in bronchial asthma

Effects of dipentyl phthalate on cognitive function and oxidative stress in mice and its modulation by N-acetylcysteine and MK-801

The comparative evaluation of efficacies of desvenlafaxine, milnacipran and fluoxetine and correlation with BDNF and other biochemical parameters in major depressive disorder

Modulation of effects of bisphenol a on animal models of epilepsy and depression by melatonin

Effect of sildenafil on experimentally induced anxiety and its modulation by nitregeric agents in rats

Evaluation of varenicline in experimental model of parkinson's disease and assessment of effect of smoking in patients of parkinson's disease

Antimicrobial drug prescribing pattern in hospitalised patients of community acquired pneumonia : A retrospective study
