

MD – Biochemistry
(Plan of Thesis) 2012-2015

A Study on Relationship of Glycated ApoB with Atherosclerosis in Type 2 Diabetes Mellitus.

MMP-2 Gene Polymorphism (-1306 C>T and -735 C>T) and Serum Levels of MMP-2, Vegf and TGF- β 1 in Pre-Eclampsia.

Evaluation of Serum Levels of NGAL/MMP-9 Complex and Adiponectin as Biomarkers for Diagnosis of Ovarian Cancer.

Evaluation of Promoter Hypermethylation of Tumor Suppressor Genes (*BRCA1* & *RASSF1A*) in Serum DNA of Epithelial Ovarian Cancer Patients

A Study of Synergistic Effect of - 174G/C Polymorphism of Promoter Region of IL-6 Gene and 469 E/K Polymorphism of Icam-1 Gene in Patients of Ischemic Stroke and Their Association with Stroke Severity and Outcome.

Study of association of vitamin D receptor gene polymorphism and vitamin D status with insulin resistance in women with polycystic ovary syndrome.
