

MS (Ophthalmology)
Title (Plan of Thesis)
(Session 2014-2017)

S.No.	Title (Plan of Thesis)
1.	Profile of Refractive Errors in Children with Autism Spectrum Disorders (ASD).
2.	Tearing in Preterm and Term Newborns.
3.	Effect of steep meridian incision in patients with 1.0 to 1.5 diopter corneal astigmatism after phacoemulsification cataract surgery.
4.	Comparative study of 25 Gauge Versus 20 Gauge Pars Plana Capsulotomy and Vitrectomy in Pediatric Cataract Surgery.
5.	Functional visual parameters in children and adults with Non-Strabismic Refractive Amblyopia.
6.	Effect of phacoemulsification with and without sodium hyaluronate cushion on functioning trabeculectomy in Angle Closure Glaucoma.
7.	Role of Mobile Game Exercises as an Adjuvant to Amblyopia in children.
8.	Evaluation of Subthreshold Laser Photocoagulation: Micropulse Diode Versus Nd: YAG Green Laser in Central Serous Chorioretinopathy.
9.	Non Contact Optical Biometry in Pediatric Age Group.
10.	Anterior and Nasal transposition versus 10MM recession of inferior oblique muscle in unilateral superior oblique palsy.
11.	To study the changes in retinal nerve fiber layer and macular thickness in patients of unilateral amblyopia following Amblyopia Therapy.

MS (Ophthalmology)
Title (Plan of Thesis)
(Session 2014-2017)

12.	Evaluation of Conjunctivorhinostomy as a Primary procedure along with Pawar's implant for the Upper Lacrimal Drainage Channel obstructions.
13.	Comparison of Polypropylene sling with combined transconjunctival retractor plication and lateral tarsal strip for correction of involutional lower eyelid ectropion.
14.	Comparative analysis of outer retinal layer thickness in early and intermediate Dry age related Macular Degeneration using Spectral Domain-optical Coherence Tomography.
15.	Evaluation of Optical Coherence Tomography and electrophysiological Tests before and after treatment of open angle Glaucoma.
16.	Comparative Evaluation of Supracapsular Phacoemulsification versus stop and chop Phacoemulsification in cataract surgery.
17.	Factors affecting adjustment to acquired vision loss in adults.
18.	Comparative study of changes in intra ocular pressure after phacoemulsification in eyes with Closed Angle vs. Open Angle.
19.	Retrospective study of comparative evaluation of functional outcomes of Glaucoma filtration device versus Mitomycin C Modulated Trabeculectomy of 2 year follow up in primary open Angle Glaucoma patients.
20.	To compare the visual outcome and structural changes in spectral domain oct following intravitreal injection Bevacizumab and ranibizumab in Idiopathic Choroidal Neovascular membrane in young adults.

MS (Ophthalmology)
Title (Plan of Thesis)
(Session 2014-2017)

21.	To assess and compare the final outcomes in Levator Palpebrae Superioris Resection and Levator Palpebrae Superioris Plication Surgery for simple Congenitor Moderate Ptosis.
22.	To study & compare the efficacy of 1% and 5% Povidone Iodine in achieving Decontamination of Donor Corneas before Harvesting.
