

MS (Ophthalmology)
Title (Plan of Thesis)
(Session 2015-2018)

| S.No. | Title (Plan of Thesis) |
|-------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. | Ocular profile of children with congenital hypothyroidism |
| 2. | Evaluation of Amniotic Membrane Transplantation with Low Dose Intraoperative Mitomycin C in Pterygium Surgery |
| 3. | Functional visual parameters in acquired cerebral visual impairment |
| 4. | Role of routine nasal examination before and after lacrimal sac massage in patient with congenital dacryocystitis. |
| 5. | Anterior segment optical coherence tomography in keratoconus |
| 6. | Role of Omega fatty acids as an adjuvant therapy in treatment of amblyopia. |
| 7. | Comparative evaluation of levator advancement versus whitnall sling with tarsotomy in simple moderate-severe congenital ptosis |
| 8. | Evaluation of treatment outcome in patients of traumatic glaucoma |
| 9. | Effect of intravitreal triamcinolone acetonide in cases of non arteritic anterior ischemic optic neuropathy |
| 10. | Comparative analysis of outer nuclear layer thickness after rhegmatogenous retinal detachment surgery |
| 11. | Non mydriatic plusoptix photoscreening versus cycloplegic retinoscopy and autorefraction in pediatric age group |
| 12. | Comparison of subthreshold diode micropulse laser and conventional laser for macular edema in branch retinal vein occlusion after intravitreal injection of triamcinolone acetonide |
| 13. | Comparative evaluation of rotational stability and visual outcome of toric intraocular lenses with and without capsular tension ring |
| 14. | Evaluation of Modified conjunctival incision in Trabeculectomy |

MS (Ophthalmology)
Title (Plan of Thesis)
(Session 2015-2018)

| | |
|-----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 15. | Evaluation of the results of pterygium surgery using the P.E.R.F.E.C.T (Pterygium Extended Removal Followed By Extended Conjunctival Transplantation) Technique |
| 16. | Cataract in young adults and its risk factors: A case control study |
| 17. | Comparative evaluation of modified circular vs inverted U-Shaped Nd: yag laser capsulotomy in pseudophakic posterior capsular opacification |
| 18. | Comparative evaluation of Corneal Endothelial Cell Changes after Phacoemulsification to the severity of Diabetic Retinopathy |
| 19. | To compare the visual outcome and central macular thickness following intravitreal injection of ranibizumab versus dexamethasone implant in patients with diabetic macular edema |
| 20. | Surgical outcomes and quality of life of patients with partial unilateral limbal stem cell deficiency following simple limbal epithelial transplantation |
| 21. | Comparison of cyclodeviation in case of inferior oblique overaction following correction by SCHEIE-PARK'S procedure versus elliot and nankin procedure" |
| 22. | A comparison between effect of a single intravitreal injection of 1.25mg bevacizumab (AVASTIN) with single intravitreal injection of 1mg triamcinolone acetonide on diabetic macular edema |
