

MS Otorhinolaryngology
Title (Plan of Thesis)
(Session 2015-2018)

S.No.	Title (Plan of Thesis)
1.	A study of correlation between glycosylated haemoglobin and sensorineural hearing loss in type II diabetic patients
2.	Mycological study in chronic suppurative otitis media-cholesteatoma disease.
3.	Usefulness of image analysis using imageJ of the interarytenoid area to detect cases of Laryngopharyngeal Reflux
4.	Clinical profile, aeroallergen sensitivity and assessment of pulmonary function in pediatric chronic rhinosinusitis
5.	Outcome of endoscopic resection of benign sinonasal tumors
6.	Retrograde identification of recurrent laryngeal nerve in thyroid surgery
7.	A comparative study of brain-stem evoked response audiometry in diabetic and non-diabetic subjects with normal hearing.
8.	Comparision of trans-septal suture technique with poly vinyl alcohol sponge nasal packing after septoplasty
9.	Change in symptomatology score after functional endoscopic sinus surgery in cases of chronic rhinosinusitis
10.	Expression of phosphatase and tensin homologue (PTEN) & HER2 in early glottic carcinoma and its relation to oncological outcomes following CO2 laser microsurgery
11.	Evaluation of D2-40 expression in oral squamous cell carcinoma
12.	Determination of success rate of endoscopic dacrocystorhinostomy using a microdebrider in chronic dacryocystitis patients
13.	Effect of medical treatment on eradiction of biofilms in chronic rhinosinusitis

MS Otorhinolaryngology
Title (Plan of Thesis)
(Session 2015-2018)

14.	A study of compare Ballon Dacryocystorhinostomy with conventional Endoscopic Endonasal Dacryocystorhinostomy for relief of distal Nasolacrimonal Drainage Obstruction
15.	A study to assess the outcomes in terms of voice quality in patients of early stage squamous cell carcinoma of larynx (Glottis) post radiation therapy using laryngeal stroboscopy and grbas scoring
